Dear Reviewer:

The USDA, Animal and Plant Health Inspection Service (APHIS), Plant Protection and Quarantine (PPQ) has conducted a grasshopper and Mormon cricket suppression program in Idaho for many years. The program is conducted on federally managed rangelands. During the winter months we review and update our environmental assessments for the program. The purpose of this letter is to invite your participation in this process. A description of the project and the proposed action are in the enclosed summary. The description of the proposed action is the same as last year and there are no changes proposed. The purpose of the review is to identify any changed circumstances or new information that should be considered in preparation for the 2011 grasshopper and Mormon cricket suppression program.

Please send comments to: USDA APHIS PPQ
 9134 W. Blackeagle Drive
 Boise, ID 83709

Comments may also be faxed to: 208-378-5794

E-Mail comments to: Brian.L.Marschman@aphis.usda.gov

Comments received will be available for public inspection at our office and will be released in their entirety if requested pursuant to the Freedom of Information Act.

Sincerely,

Brian Marschman
State Plant Health Director Idaho
